

Ultimate Destiny and the Work of Dr. David Hawkins

The Ultimate Destiny team has taken to heart the work and writings of Dr. David Hawkins. Based on his work with kinesiology, Dr. Hawkins has revealed a human 'scale of consciousness', that he has arbitrarily ranged from 0 – 1000. Lowest on this scale is shame (value of 20), followed by expanding levels of consciousness moving up the scale until reaching enlightenment (value of 1000).

On this 'clod to God' scale, a tipping point exists at 200. The 200 level represents courage, and is the point beyond which human consciousness begins in earnest the climb toward enlightenment. According to Dr. Hawkins, humanity as a whole has dwelt in the ranges below 200. Kinesiology indicates, however, that humanity has in the past few years experienced a prompt jump to just above the 200 level.

Interestingly, the process initiated beyond level 200 is one of empowerment. The Ultimate Destiny team has focused for many years on bringing tools of empowerment to the segments of humanity that, to this time, have not had access to such tools. Thus, our work supports the movement described by Dr. Hawkins' work, and his work validates our field of service.

The time has come to empower humanity such that it may fulfill its destiny of reaching a higher level of conscious understanding. Ultimate Destiny, along with its partners, supports this movement by providing tools for empowerment and enlightenment to the world.

Although our products focus primarily on empowering others, we realize that many of our customer organizations are comprised of individuals who have advanced beyond the stage of empowerment. These individuals are moving beyond empowerment to the ascending consciousness levels Dr. Hawkins describes sequentially as willingness, acceptance, reason, love, and joy.

Some of our alliance partners and product providers have focused their energies on creating products and programs resonant with these higher levels of consciousness. In this way, Ultimate Destiny is able to serve the underserved, and at the same time serve those whose mission is to serve the underserved. Furthermore, we serve our alliance partners and providers by vastly increasing their market outreach.

We perceive our role to be purveyor of a new business model – one in which heart based relationships and the collaboration inherent in these relationships ensures profit. Our mission is to facilitate creation of service-based relationships where all parties benefit. In this model, profit is shared by all, be that profit tangible in the form of money or intangible in the form of service and/or rising consciousness.
